

Transcript of Interview with Alex Rivera (Roommate of Missing Person Jane Smith)

Date: 2023-11-01

Location: Smith Residence – Living Room

Officer: So, when was the last time you saw Jane?

Alex: Uh, this morning, around 8? Yeah, 8:00 AM, I think. She left for work like she usually does. She seemed a bit off though, kinda tired? But I didn't think too much of it at the time.

Officer: Has she ever gone missing before?

Alex: No, never. She's really consistent with her routine — work, meds, everything.

Officer: You mentioned "meds." Does Jane take medication regularly?

Alex: Yeah, she has a condition — epilepsy. She's had it for years. She takes a couple things... I think Lamotrigine? And there's another one... Clonazepam, I believe. She usually takes one in the morning and one before bed.

Officer: Did she take them today?

Alex: I saw her take something with her coffee around 7-ish, probably the Clonazepam. And the Lamotrigine she took closer to when she left, like 8. So yeah, pretty sure she took them.

Officer: And you're certain about the timing?

Alex: As certain as I can be without staring at the pill bottle, yeah. She's very good about taking them, but if she misses a dose — I mean, it's serious. Like seizure serious.

Officer: Got it. Anything else we should know?

Alex: Just... Jane's really careful, but if she's stressed or tired — like today — that's when she's more at risk. I really hope she didn't have a seizure on the way to work or something...
